

## Olivia Standing Desk

### Installation

- Installation Difficulty: Medium
- Number of People Needed: 2
- Estimated Time: 90 minutes
- Other Tools Needed: No

#### List

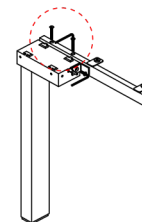

- ① Panel ② Round caps ③ Lift (with screws)
- ④ Wire box ⑤ M4\*16 self-tapping screw ⑥ M6\*25 flat head screw
- ⑦ M4 hexagonal wrench

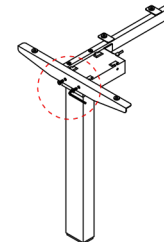

#### Step 1

- Before installation, please lay a layer of packaging cartons or carpet on the ground as a buffer to avoid damage to the goods.
- Assemble the lifting motor: find the corresponding screw in the lift package and fix the lifting bracket

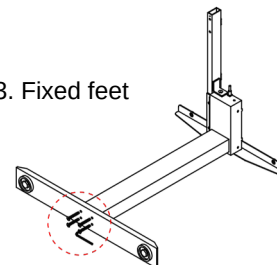

##### 1. Fix the bracket

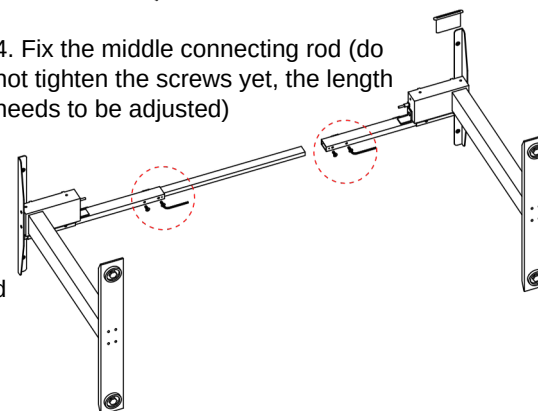

##### 2. Fix bracket

##### 3. Fixed feet

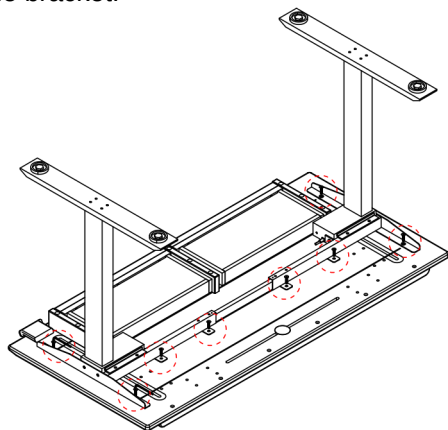

##### 4. Fix the middle connecting rod (do not tighten the screws yet, the length needs to be adjusted)

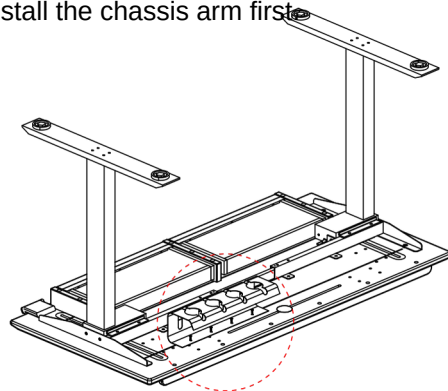

### Step 2

Fix the lift to the panel with M6\*25 screws, and then tighten all the screws of the bracket.

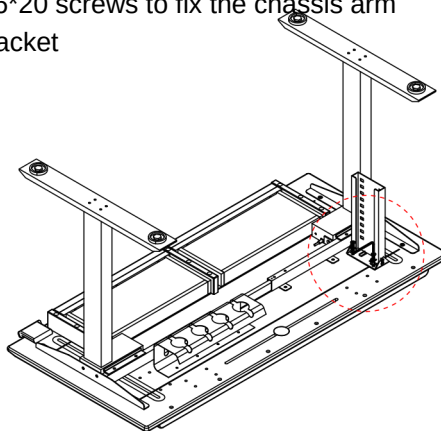

### Step 3

Use self-tapping screws to fix the wire box in the appropriate position. If you have purchased the chassis arm, install the chassis arm first.

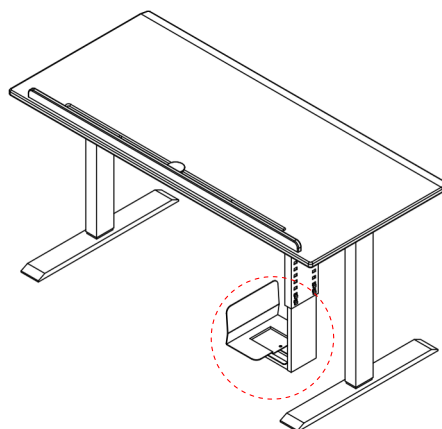

### Step 4

If you have purchased a chassis arm, you can select a suitable location to install it in the reserved hole under the panel. Use m6\*20 screws to fix the chassis arm bracket

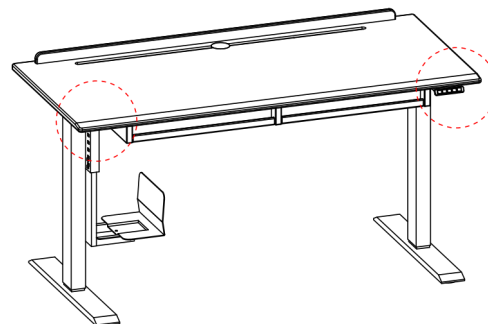

### Step 5

Mount the chassis arm bracket

### Step 6

Fix the lift handle The handle can be fixed on the left or right side according to operating habits or convenience

Connect the data cables and power cables of the lifts on both sides to the handles, turn on the power, and test whether the lifting function is normal.

Installation Completed
